DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: at least one element linking the stationary cam and a wall to perform "gravity hinge assembly" since claim 1 and claim 17 only recite a hinge assembly partially without addressing a complete, operable hinge as required by 35 U.S.C. 112 second paragraph. There would be no "hinging" without a structure connecting the assembly to the wall. Therefore, the invention as claimed renders the hinge assembly inoperable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Foltz (3,083,402). '402 has a rotating cam 46 with a discontinuous raised wall 48, a seat depression (flat top surface at the base of wall 48), a stationary cam 30 not connected to the rotating cam an with a nipple 32, and a connection plate 42 with interior portion

Art Unit: 3676

(that portion in contact with top of cam 46). Cams 46 and 30 are made of Nylon and "Nylon" is a self-lubricating material.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Foltz '402.

'402 discloses the invention as claimed but for the shape of the connecting plate. It would have been an obvious matter of design choice to make the different portions of the plate a tri-lobal geometry or whatever form or shape was desired or expedient. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47.

7. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foltz '402 in view of Hensley (4,113,194).

402 does not show the Nylon including a lubricant. '194 teaches a Nylon slide (114) having molybdenum for lubricating the slide. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the Nylon cams with molybdenum to lubricate the sliding cams.

Allowable Subject Matter

8. Claims 10-16 are allowed.
9. Claims 7 and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
10. Claim 17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
